

EVAN DAVID FOUNDATION

"Because a Child is a Precious Gift"

ABOUT THE GRANT

The Evan David Foundation ("Foundation") Board of Directors will select grant applicants who are uninsured, or underinsured, for fertility treatment. The grant can be used toward fertility treatment with a physician who submits the Physician Letter.

THE GRANT PROCESS

Confidential applications are reviewed and selected by a volunteer Board of Directors. Review of applications will occur at Board meetings several times each year.

When the Foundation receives your complete application, including all required forms and attachments, you will get a notice in writing that states that your application will be reviewed at the next available Selection Meeting of the Board. If your application is received and is incomplete, a letter will be sent to you indicating the missing item(s). You may be asked to submit the missing item(s) in a timely manner in order to be considered for the nearest Selection Meeting of the Board. If your application is missing more than one item, your application will not be considered at that time. If the missing item(s) is/are subsequently supplied, your completed application will be considered at a following Selection Meeting, at which time the Board will also consider additional applications. Applications will be accepted and reviewed on a rolling basis until all Grant money is committed.

While we would like to offer grants to every qualified applicant, not all applicants will receive grants. Grant amounts vary among grant recipients, and both partial and full grants can be awarded. Therefore, you are encouraged to seek additional funding from other sources. A list of what is covered under the grant (doctor fees, monitoring, some lab work, procedures, ultrasounds, etc.) will be given to both the grant recipient and her Physician at the time of the award. Funds from the grant will be paid directly to the Physician or to the medical imaging office. Funds will NOT be given directly to the grant recipient.

All Application forms can be found at www.EvanDavidFdn.org
